

[Measurement of the leptonic branching ratios of the \$\[\tau\]\$ lepton using the OPAL detector at LEP /](#) by James Christopher Clayton.
Birmingham : University of Birmingham, 1995.

[Investigation of the use of optical modulators for analogue data readout from particle physics detectors /](#) by Kenneth Andrew Webster.
Birmingham : University of Birmingham, 1995.

[A study of the centrally produced \$\[\eta \pi^{+}\] \[\pi^{-}\]\$ and \$\[\pi^{+}\] \[\pi^{-}\] \[\pi^{0}\]\$ systems at 450 GeV/c /](#) [by] Christopher J. Dodenhoff.
Birmingham : University of Birmingham, 1994.

[Evaluation of the strong coupling constant using resummation techniques at OPAL /](#) Mark A. Whalley.
Birmingham : University of Birmingham, 1993.

[A measurement of the average B hadron lifetime and B fraction in multihadronic decays of the \$Z^{0}\$ at OPAL /](#) by Jonathan Paul Walker.
Birmingham : University of Birmingham, 1993.

[A measurement of mixing in the \$B_0 B_0\$ system and extraction of the \$Z^0\$ coupling to b quarks using prompt leptons at OPAL /](#) Nicholas James Thackray.
Birmingham : University of Birmingham, 1993.

[Track reconstruction in the forward muon subdetector and investigations concerning the Photon remnant in the H1 detector at HERA /](#) by Hywel Thorburn Phillips.
Birmingham : University of Birmingham, 1993.

[A first level forward muon trigger for the H1 experiment at HERA /](#) by Gareth Wyn Noyes.
Birmingham : University of Birmingham, 1993.

[Applications of optoelectronics in high-energy physics /](#) by Michael Stuart Haben.
Birmingham : University of Birmingham, 1993.

[Production of strange and multistrange baryons in ultrarelativistic heavy ion collisions /](#) Richard P. Barnes.
Birmingham : University of Birmingham, 1993.

[The detection and analysis of muons in leptonic decays of the \$Z^{0}\$ particle at opal /](#) Stephen James Hillier.
Birmingham : University of Birmingham, 1992.

[A study of heavy quark production on the Z⁰ resonance using muons at OPAL](#)

/ David Llewellyn Rees.

Rees, David Llewellyn.

Birmingham : University of Birmingham, 1992.

[Event reconstruction and a study of electroweak effects in e⁺ e⁻ → μ⁺ μ⁻ \(γ\) at OPAL](#)

/ by Nigel Keith Watson.

Birmingham : University of Birmingham, 1990.

[The construction and operation of streamer tubes used to detect muons produced in e⁺ e⁻ collisions in the OPAL experiment at CERN](#)

/ Timothy John Smith.

Birmingham : University of Birmingham, 1990.

[B meson decays at the CERN proton-antiproton collider](#) / Mark Nikitas.

Birmingham : University of Birmingham, 1990.

[The UA1 trigger processor and a study of jet production](#) / Jonathan Michael Gregory.

Birmingham : University of Birmingham, 1990.

[The detection of muons produced in electronic positron collisions at the OPAL experiment](#) / Matthew J. Couch.

Birmingham : University of Birmingham, 1990.

[A study of the central system in proton-proton collisions at 300 GeV/c](#) / by Russel J. Childs.

Birmingham : University of Birmingham, 1990.

[A search for non-qq⁻ mesons in central production](#). Andy Kirk

[Great Britain] : University of Birmingham, 1989.

[Direct meson production at P_T > 2 GeV/c in 300 GeV/c π⁻ - be interactions](#) / Mary Thérèse Trainor.

Birmingham : University of Birmingham, 1988.

[V⁰ production and the NC/CC ratios in ν⁻ and ν⁻-p interactions](#) / Roger William Lewis Jones.

Birmingham : University of Birmingham, 1988.

[A search for the top quark at the CERN proton-antiproton collider](#) / David George Charlton.

Birmingham : University of Birmingham, 1988.

[J/ψ production properties at the CERN proton-antiproton collider](#) / Navjit Singh Bains.

Birmingham : University of Birmingham, 1988.

[The Birmingham 370E system](#) /by Paul J.A. Skimming.

Birmingham : University of Birmingham, 1987.

[A study of heavy flavour production in muon events at the CERN PP collider](#) / Martin Paul Jimack.

Birmingham : University of Birmingham, 1987.

[The masses of the W and Z bosons and a search for their supersymmetric leptonic decays at the CERN collider](#) / Stephen James Haywood.

Birmingham : University of Birmingham, 1987.

[20 GeV charm photoproduction](#) /by Duncan A. Waide.

Birmingham : University of Birmingham, 1986.

[Properties of muons and jets in proton-antiproton collisions at 540 and 630 GeV centre of mass energy](#) / Jonathan Mark Streets.

Birmingham : University of Birmingham, 1986.

[Central meson production at 85 GeV/c](#) / by Ian Charles Print.

Birmingham : University of Birmingham, 1986.

[A measurement of the structure function of the pi meson and a study of resonance production in neutrino-proton interactions](#) /Bruce William Kennedy.

Birmingham : University of Birmingham, 1986.

[J/\[psi\] production in proton-antiproton collisions at \$\sqrt{s} = 630\$ GeV](#) / Thomas Robert Edgecock.

Birmingham : University of Birmingham, 1986.

[A study of dimuons produced by hadrons incident at 39.5 GeV/c on fixed nuclear targets](#) / Robert James Vallance.

Birmingham : University of Birmingham, 1985.

[Properties of the hadronic shower produced by neutrino and antineutrino interactions in a neon target](#) / by Robin Paul Middleton.

Birmingham : University of Birmingham, 1985

[Strangeonium production and \$\chi\$ production in K⁺ - p interactions at 8.25 GeV/C.](#) by Orlando Villalobos Baillie

Birmingham : University of Birmingham, 1983.
